Was the Horten Ho 229 ever used? It looks for all the world like a modern-day stealth aircraft – but from 75 years ago. A prototype aircraft flew in test flights in February 1945 – just three months before the end of WW2 in Europe. The results were encouraging, but there was no time and no manufacturing capability to develop it to operational status.

Where is the Horten Ho 229 now? The only surviving Ho 229 airframe, the V3—and the only surviving Second World War-era German jet prototype still in existence—is on display in the main hall of the Steven F. Udvar-Hazy Center of the Smithsonian National Air and Space Museum (NASM) alongside other WWII-era German aircraft.

Was the Horten 229 a stealth? In his later life, Reimar Horten promoted the idea that the Horten Ho 229 V3 was intended to be built as a stealth aircraft, which would have placed this jet's design several decades ahead of its time.

What were the flying wings of the Horten Brothers? The first Horten glider flew in 1933, by which time both brothers were members of the Hitler Youth. The Hortens' glider designs were extremely simple and aerodynamic, generally consisting of a huge, tailless albatross-wing with a tiny cocoon of a fuselage, in which the pilot lay prone.

Did the Ho 229 see combat? Despite its advanced design, the Horten Ho 229 never saw combat during World War II, as only prototypes were completed before the end of the war. However, the aircraft underwent testing and evaluation by the Luftwaffe, demonstrating impressive performance characteristics, including high speed and agility.

Could the Ho 229 fly? Did the Horten 229 ever fly? The first prototype V1, which had no engine and a fixed landing gear, made several flights from March 1, 1944, until it crashed on landing. The prototype V2 equipped with two Jumo 004 was said to have taken off unintentionally during taxiing tests on December 18, 1944.

What was the difference between the ME 262 and the Ho 229? According to Reimar and Walter, the Me 262 had a much higher wing loading than the H IX and it required such a long runway to take off that only a few airfields in Germany could accommodate it. The Ho 229 wing loading was considerably lower and this allowed it to operate from airfields with shorter runways.

What is the nickname of the Ho 229? An American intelligence officer nicknamed the Ho 229 V3 the “Bat-Wing Ship.” Reimar Horten preferred the designation Horten H IX V3 while some writers called the jet Gotha Go 229, however Ho 229 reflects the official status bestowed on the project by the German Air Ministry after Hermann Göring approved it in 1943, ...
